

Integrated Furnace Controls

From Nathan

I have received many questions concerning what **integrated furnace controls** are in certain furnaces. The other question is if they are an **80 volt or 120 volt** ignitor control board.

I hope this [chart](#) helps you. It was passed on from the great team at American Standard.

It provides the White Rogers number, the present American Standard production number, and the number we care most about when ordering- the **CNT number**.

As always call me if you have any questions.

Thank you and have a great week.
